EDUCATION

Northeastern University **Jan 2025 - May 2027**
Master of Science, Information Systems

Alagappa University **Aug 2020 - Apr 2022**
Master of Business Administration

Anna University **July 2015 - Apr 2019**
Bachelor of Engineering, Electronics and Communication

TECHNICAL SKILLS

- **Programming & Software Engineering**: Python, SQL, Java, Data Structures, Algorithmic Problem Solving, Object-Oriented Design (OOD), A PI Development (FastAPI), RESTful Services, Modular Architecture, Microservices Design, C++, JavaScript
- **AI, Agents & Automation**: OpenAI APIs, Anthropic APIs, LangChain, LangGraph, Multi-Agent Systems, RAG, MCP, ReAct reasoning, Vector DB, NLP pipelines, Structured extraction (Instructor + Pydantic), Blender MCP, AI Orchestration Pipelines
- **Cloud, Deployment & DevOps**: AWS (Kubernetes, EC2, S3, IAM), GCP, Docker, CI/CD (GitHub Actions), Airflow Orchestration, Linux, **Distributed Systems**, Containerized Microservices, Infrastructure Automation, DVC
- **Data Engineering & Workflow Systems**: ETL pipelines, semantic search, data ingestion, workflow orchestration (Airflow, n8n), web scraping automation (Selenium/BeautifulSoup), API integration, versioning & logging, PDF Parsing, Arelle
- **Databases:** MySQL, PostgreSQL, MongoDB, Oracle Cloud Database, Microsoft Azure Data Lake, Databricks, Snowflake, SSMS, DBeaver
- **Machine Learning & Analytics**: Feature engineering, classical ML (XGBoost, Scikit-learn), A/B testing, statistical modeling, evaluation pipelines, data validation & quality checks, Pyspark
- **Visualization & Frontend Interfaces**: Streamlit, Plotly, Power BI, Tableau, Advanced Excel, ER Studio, Alteryx Designer, Dashboard generation, UI workflows for analytics systems

EXPERIENCE

BankBazaar.com **Jan 2023 - Sep 2024**
Data Analyst – Systems & Automation *Chennai*

- Designed **data pipelines, automation workflows, and system integrations** to eliminate operational bottlenecks across financial and technology platforms.
- Built **analysis-ready datasets, data models, and reporting services** supporting traceable, versioned financial and operational metrics.
- Collaborated with **engineering, QA, and platform teams** to translate system insights into scalable process automation, driving **20% operational efficiency gains** through workflow optimization.

SMRC Automotive Products India Ltd **May 2022 - Dec 2022**
Data Analyst Intern – Finance & Operations *Chennai*

- Developed **data processing workflows and reporting systems** supporting procurement, finance, and operations analytics, contributing to a **15% cost reduction** in procurement optimization initiatives.
- Built **structured data models and validation pipelines** for forecasting and financial reporting accuracy.
- Partnered with **finance, operations, and systems teams** to convert raw operational data into **automated decision-support systems** for budgeting and vendor analytics.

PROJECTS

Prompt2Mesh - Agentic Text-to-3D Modeling Platform | Prompt2Mesh
Designed and deployed a **cloud-native distributed AI orchestration platform** (LangGraph, MCP, FastAPI, AWS EKS) that converts natural-language prompts into editable Blender models with automated planning and tool execution, reducing manual modeling effort by ~60% and enabling iterative vision-based refinement loops.

Project ORBIT - Automated PE Intelligence & Agentic Dashboard System | Project ORBIT
Built a containerized **RAG-based intelligence platform** (Airflow, Pinecone, OpenAI, AWS EC2) processing 50+ companies, automating webscraping, semantic indexing, and dashboard generation, reducing manual due-diligence research time by ~70% while supporting versioned enrichment and logging.

Prismly – AI Brand Intelligence Automation (n8n + OpenAI) | Prismly
Developed and deployed a **Streamlit-based AI automation platform** integrated with **n8n workflows and OpenAI GPT-4o-mini** to process RSS feeds and analyze **100+ articles in ~5 minutes**, delivering automated sentiment insights and competitive intelligence.

Project AURELIA - Financial Concept Extraction Pipeline (RAG Automation) | Project AURELIA
Developed an AWS-hosted Airflow + FastAPI pipeline that parsed, embedded, and retrieved 1,000+ structured financial concept chunks using vector search (OpenAI + Pinecone), improving retrieval precision and accelerating automated reporting workflows.

Dow 30 Earnings Automation - AI-Driven Reporting Workflow | Dow 30
Engineered an end-to-end ETL system (Selenium, Docling, OpenAI, Airflow, S3) to ingest and structure earnings reports for 30 public companies, re ducing manual parsing effort by ~80% and enabling scalable analytics-ready storage.

EcoCart – E-Commerce Application | Eco-Cart
Developed a Java + MongoDB e-commerce platform with catalog, cart, and order workflows; improved query performance ~40% via indexing and designed scalable, modular architecture.
